

CPYSL ONLINE FIELD CLOSURE ENHANCEMENTS

CPYSL is enhancing its online field closure procedures for the spring 2019 season and we need your help.

In the event of inclement weather, we are working on making it possible for your club to close an individual field at a location (venue) rather than having to close the entire location (venue). This will be a great tool if you have a location where one field drains well and remains playable while others retain moisture creating the need for closure. In order to make this system work properly, you will need to list each individual field for each location (venue) listed for your club.

Please reference the example below...Hampden Park Fields is listed as the location (venue) and then the six fields at the Hampden Park location (venue) are listed individually.

The screenshot shows a web browser window at www.cpyssl.net/Fields/field.asp. The page is titled 'Venue' and displays the following information:
